Education

Gautam Buddha University
Bachelor of Information Technology (GPA:9.00/10.00)

May 2025
Greater Noida , Uttar Pradesh

Experience

FORASOFTWARE
AI ML Intern

Sep 2025 – Feb 2026

- **AI-Powered Resume Screener:** Built a pipeline to parse PDF/DOCX/TXT resumes and rank candidates using TF-IDF, embeddings, and LLM scoring; developed a FastAPI backend and React dashboard on Microsoft Azure.
- **HealthFora:** Developed a healthcare platform connecting patients, doctors, pharmacies, and hospitals. Built user dashboards, an AI chatbot, digital prescriptions with secure pickup codes, and a verified onboarding flow.

NULLCLASS
Data Analyst Intern

Jul 2024

- Enhanced data-driven decision-making by creating a real-time Twitter Analytical Dashboard using Power BI, integrating ETL processes and DAX queries, resulting in a 20% improvement in tracking social media trends.
- Delivered actionable insights on user engagement behaviors by analyzing social media metrics and trends, enabling data-driven strategies that led to a 15% increase in campaign effectiveness for marketing teams.

Projects

AI-Powered Resume Screener - | *React, FastAPI, Azure OpenAI*

- Built an AI resume screening system to parse **PDF/DOCX/TXT** resumes, extract key skills and experience, and rank candidates using a hybrid NLP approach (TF-IDF, embeddings, and LLM scoring).
- Developed a FastAPI backend and React dashboard integrated with Microsoft Azure services (Azure OpenAI, Blob Storage, Redis) for intelligent candidate ranking and recruiter analytics.

SHL Assessment Recommendation Assistant - | *FastAPI, Streamlit, ChromaDB, Gemini/Groq API, Hugging Face, LangChain*

- Designed a conversational SHL assessment recommender that ingests catalog data, creates embeddings, and uses ChromaDB retrieval to surface relevant test options based on role and skill requirements.
- Implemented a FastAPI backend and Streamlit interface with clarification-first interactions, structured recommendation output, and Groq-powered LLM reasoning for accurate assessment matching.

Utilities_Yolov8 - | *Python (Streamlit, PyTorch, OpenCV), YOLOv8, Labelling, Google Colab*

- Engineered a custom kitchen utilities object detection pipeline using YOLOv8, annotated via Labelling for spoons, cups, and plates; optimized dataset splits and applied augmentations to improve mAP.
- Implemented an interactive Streamlit app for image, video, and webcam inference: managed uploads, asynchronous processing, and real-time rendering of bounding boxes with confidence scores; deployed via Colab/ngrok and integrated GitHub CI.

Other Projects

- **TalentScout Hiring Assistant:** Built an AI hiring assistant using **Streamlit** and **Groq API** to automate candidate screening and generate tailored interview questions based on skills and experience.
- **RAG ChatFlow:** Developed a Retrieval-Augmented Generation chatbot using **Gemini/Groq API** and **ChromaDB** to retrieve relevant document chunks and generate context-aware responses through a conversational interface.

Technical Skills

Programming Languages : Python, SQL, C

Tools & Technologies : FastAPI/Streamlit, LangChain, ChromaDB, Hugging Face, Azure OpenAI, TensorFlow, Scikit-Learn, Pandas, Git

Skills : Machine Learning , Deep Learning, NLP/LLM, RAG, Prompt Engineering, Computer Vision, Data Analysis

Certifications

- **Certified in Data Science Specialization** - LinuxWorld
- **Data Analytics and Visualization Job Simulation** - Accenture (Collab with Forage)
- **Deploy Machine Learning Solution** - Devtown (Collab of Microsoft Learn & GDG Ranchi)
